

Game-mechanics

At the core of *Sprezzatura* lies a original dice resolution called the *Resonance System*. During a **Challenge**, a moment of uncertainty in the conversation between the participants at the table called the **Gathering**, the **Host** will ask the active player to describe their action.

Core Mechanics: the *Resonance System*

The building blocks of this unique resolution mechanics are:

- Rules of **Consonances** describing how to assemble **Triumphs** by pairing together dice and the four **Temperaments** as main attributes.
- **Minor Arcanas** are a form of metacurrency in the form of cards that a player can use to increase their chances of success.
- A player can rely on their own **Resonance Pool**, a latent pool of previously unused dice that can be used to assemble Consonances with the current dice pool. Other players can help by allowing the active player to draw from their Resonance Pool.

Emulating oppositions: Wheels

Every form of opposition to the player characters is represented by [Wheels](#). The length of a [Scene](#) is based on the number of [Wheels](#) to exhaust and it is a function of the current [Major Arcana](#).

Temporary Game Masters and Moods: the Host and Major Arcanas

[Major Arcana](#) cards are powerful emblematic symbols that will dictate the mood of each [Scene](#). The player placing the last [Major Arcana](#) on the table, called the [Host](#), is designed as temporary Game Master and they are responsible to describe the content of the [Scene](#) to the fellow player, in a short and concise description, or *argomento*. Furthermore, each [Major Arcana](#) card temporarily influence the game-mechanics with some alternative rules.

At the beginning of a [Session](#), usually is the player with the highest [Station](#) value on the [Goose Game](#) that may place a [Major Arcana](#) for the first [Scene](#). If they have no [Major Arcana](#) on their hand, the next player on their left may play a card and be designated as [Host](#). The subsequent [Hosts](#) can be organically designated by the [Gathering](#). In case of multiple candidates, just give precedence in clockwise order from the last [Host](#).

Players' resources: Game of the Goose and Minor Arcanas

During a game of *Sprezzatura*, players' resources are represented by a station on the [Royal Game of the Goose](#) and cards, draw from a communal deck of [Major](#) as well as [Minor](#) tarots.
